

Nat 5 Prelim 2 – Non-Calculator		20
1.	Evaluate $2\frac{3}{5} \times \frac{2}{7}$	2
2.	The standard deviation of 1,2,2,2,8 is equal to \sqrt{a} Find the value of a	3
3.	The population of a village fell by 20% in one year. If there are now 240000 people in the town, what was the population last year	3
4	Express this fraction with a rational denominator $\frac{5}{2\sqrt{3}}$	2
5.	Find the equation of the line joining points (2,4) and (6, 10) Find the coordinates of the point where this line crosses the x-axis	3 2
6.	<p>The diagram shows part of the graph of the parabola which has a minimum turning point at (3, -9).</p>  <p>(a) Write down the equation of the parabola in the form $y = (x - a)^2 + b$</p> <p>The parabola cuts the x - axis at the origin and the point B.</p> <p>(b) What is the length of OB?</p>	2 3

	Nat 5 Prelim Revision – Calculator	30
1.	<p>Membership of a health club has been increasing at the rate of 12% per annum.</p> <p>The present membership is 2580. If it continues to increase at this rate, what will the membership be in 4 years time?</p> <p>Give your answer correct to 3 significant figures.</p>	4
2.	<p>The capacities (to the nearest 1000) of the six largest football stadiums in Scotland are:</p> <p style="text-align: center;">61 51 50 23 19 18</p> <p>(a) Calculate the mean and standard deviation of this data.</p> <p>(b) The mean capacity for the six largest stadiums in England is 63.8 thousand with a standard deviation 16.4. Compare the capacities of stadiums in England with those in Scotland.</p>	4 2
3.	<p>The diameter of an ordinary snooker ball is 5.25cm.</p> <p>(a) Calculate the volume of a snooker ball giving your answer correct to 3 significant figures.</p> <p>(b) On board a ship the game of snooker is played with coloured discs instead of balls in case the sea is rough.</p> <div style="text-align: center;">  <p>The diagram shows a 3D perspective of a cylindrical disc. A horizontal dashed line above the disc indicates its diameter, labeled '2.5cm'. A vertical dashed line to the right of the disc indicates its height, labeled 'h cm'.</p> </div> <p>The volume of each disc is half the volume of a snooker ball. If the disc has radius 2.5cm, calculate the height of it.</p>	4 3
4.	<p>Determine the nature of the roots of the quadratic equation</p> $9x^2 - 6x + 1 = 0$	2

5. A cone is formed from a paper circle with a piece removed

Calculate the

- (a) The area of card used to make the cone
- (b) The circumference of the base of the cone

3
2

6. The parabola in the diagram has
The equation $y = 3x^2 + 4x - 2$.

The parabola cuts the x -axis at
P and **Q**.

Find the coordinates of **P** and **Q**
Giving you answers correct to **1**
decimal place.

Answers

Paper 1	Paper 2
1. $\frac{13}{5} \times \frac{2}{7} = \frac{26}{35}$	1 $2580 \times 1.12^4 = 4059.679949$ Membership is 4060
2. mean is 3, $(x + \bar{x})^2 = 32$ $S = \sqrt{a} = \sqrt{\frac{32}{4}} \quad a = 8$	2. (a) mean is 37, Using the first formula $(x - \bar{x})^2 = 1822, \quad s = \sqrt{\frac{1822}{5}} = 19.09$ Using the second formula $\sum x = 222, \sum x^2 = 10036,$ $s = \sqrt{\frac{10036 - (222^2)/6}{5}} = 19.09$ (b) In England the stadium capacities are larger overall (higher mean) and more consistent (lower standard deviation)
3. 80% = 240 000 10% = 30 000 100% = 300 000	3. $V = \frac{4}{3} \times \pi \times 2.625^3 = 75.766379... = 75.8 \text{ cm}^3$ (b) $\frac{75.8}{2} = \pi \times 2.5^2 \times h \rightarrow h = \frac{37.9}{6.25\pi} \rightarrow h = 1.93 \text{ cm}$
4. $\frac{5}{2\sqrt{3}} \times \frac{\sqrt{3}}{\sqrt{3}} = \frac{5\sqrt{3}}{6}$	4. $b^2 - 4ac = (-6)^2 - 4(9)(1)$ $b^2 - 4ac = 0$ quadratic equation has two real equal roots
5. $y = \frac{3}{2}x + 1$ $0 = \frac{3}{2}x + 1, \quad x = \frac{-2}{3}, \quad \left(\frac{-2}{3}, 0\right)$	$Area = \frac{250}{360} \times \pi \times 40^2 = 3490.66 \text{ cm}^2$ 5. $Circumference = \frac{250}{360} \times \pi \times 80 = 174.5 \text{ cm}$
6. $y = (x - 3)^2 - 9$ The axis of symmetry is $x = 3$ From the origin to the axis of symmetry is 3 units, therefore OB is 6 units If you expand the completed square $y = x^2 - 6x$ roots are $x(x - 6) = 0, \quad x = 0$ and $x = 6$ OB is 6 units	6. Using the quadratic formula $a = 3, \quad b = 4, \quad c = -2$ discriminant is $(4)^2 - 4(3)(-2) = 40$ $x = \frac{-4 \pm \sqrt{40}}{2(3)}, \quad x = -1.72075.. \quad x = 0.3874...$ P is (-1.7, 0) and Q is (0.4, 0)
