6	A health food shop produces probiotic capsules for its customers. Each capsule is in the shape of a cylinder with hemispherical ends as show below  <p>The diagram shows a capsule with a cylindrical middle section and hemispherical ends. A horizontal double-headed arrow above the capsule indicates the length of the cylindrical section is 12 mm. A longer horizontal double-headed arrow below the capsule indicates the total length of the capsule is 20 mm. Dashed vertical lines represent the hemispherical ends.</p> The total length of the capsule is 20 millimetres and the length of the cylinder is 15 millimetres. Calculate the volume of one capsule. Give your answer correct to 2 significant figures .	5
