

### Answers to Revision Paper A

1	$984 \times 0.9^3 = 717.336$ <b>720 pupils</b>
2	$(x + 2)(4x^2 - 5x - 1)$ $= 4x^3 - 5x^2 - x + 8x^2 - 10x - 2$ $= \mathbf{4x^3 + 3x^2 - 11x - 2}$
3	$5 - (2x - 1) < 15, 5 - 2x + 1 < 15, -2x < 9, \quad x > -\frac{9}{2}$
4	<p>Line CR is a tangent to the circle at P, so triangle CPB is right-angled.            Angle CBP = <math>90^\circ - 51^\circ = 39^\circ</math>            Triangle EPC is a right-angled triangle in a semicircle with a right-angle at E.            Hence angle EPR = <math>90^\circ - 39^\circ = \mathbf{51^\circ}</math></p>
5	<p>In Arran:            The median is 39, the quartiles are 27 &amp; 47.5, the semi-interquartile range is <math>\frac{47.5-27}{2} = 10.25</math></p> <p><b>On average</b> more people voted in Dundee than in Arran. The voting numbers in Arran were <b>less consistent</b> than in Dundee. (In Dundee they were more consistent or less varied).</p>
6	$\frac{3}{x} + \frac{4}{x+1} = \frac{3(x+1)}{x(x+1)} + \frac{4x}{x(x+1)} = \frac{\mathbf{7x+3}}{x(x+1)}$
7	$H = \sqrt{2t - a} \rightarrow H^2 = 2t - a \rightarrow H^2 + a = 2t \rightarrow \frac{\mathbf{H^2 + a}}{2} = t$
8	<p><math>5c + 6s = 7.37</math>    <math>15c + 18s = 22.11</math>    <math>8s = 4.16, s = 0.52</math> and <math>c = 0.85</math>  <math>3c + 2s = 3.59</math>    <math>15c + 10s = 17.95</math></p> <p><b>Chocolate is £0.85 and sweets are £0.52</b></p>
9	<p>Gradient is <math>\frac{35-23}{17-11} = \frac{12}{6}</math>    Straight line is <math>y = \mathbf{2x + 1}</math>            A film score of 8 would give a sports score of <b>17</b></p>
10	<p>Form a right-angled triangle</p> <div style="text-align: center;">  </div> <p>Using Pythagoras, <math>13^2 - 10^2 = 69, x = 8.3</math> The width of the shape is <math>13 + 8.3 = \mathbf{21.3 cm}</math></p>
11	<p><math>3x - 5y - 10 = 0, \quad -5y = -3x + 10, \quad y = \frac{3}{5}x - 2</math></p> <p>The gradient is <math>\mathbf{m = \frac{3}{5}}</math> and the y-intercept is <math>\mathbf{(0, -2)}</math></p>
