| 1 | Order the scores $1216 \|$17 18 18 21 $22 \mid$ 26 27 <br> The median is 18 , the quartiles are 16.5 and 24 . The interquartile range is $24-16.5=\mathbf{7 . 5}$ On average scores were higher in the second round. In the second round scores were less consistent (more varied). OR the scores were more consistent in the first round. |
