

Quadratic Graphs

YEAR	PAPER	QUESTION
2014	1	<p>The diagram below shows part of the graph of $y = ax^2$</p>  <p>Find the value of a.</p> <p style="text-align: right;">2</p>
2014	1	<p>The diagram below shows the path of a small rocket which is fired into the air. The height, h metres, of the rocket after t seconds is given by</p> $h(t) = 16t - t^2$  <p>(a) After how many seconds will the rocket first be at a height of 60 metres? 4</p> <p>(b) Will the rocket reach a height of 70 metres? Justify your answer. 3</p>

2015	1	<p>The graph below shows part of the parabola with equation of the form</p> $y = (x + a)^2 + b.$  <p>The minimum turning point $(2, -4)$ is shown in the diagram.</p> <p>(a) State the values of</p> <p>(i) a 1</p> <p>(ii) b. 1</p> <p>(b) Write down the equation of the axis of symmetry of the graph. 1</p>
2016	1	<p>10. Sketch the graph of $y = (x - 3)^2 + 1$. On your sketch, show clearly the coordinates of the turning point and the point of intersection with the y-axis. 3</p>
2017	1	<p>14. The graph below shows a parabola with equation of the form $y = (x + a)^2 + b$.</p>  <p>The equation of the axis of symmetry of the parabola is $x = -5$.</p> <p>(a) State the value of a. 1</p> <p>The point $(-3, 8)$ lies on the parabola.</p> <p>(b) Calculate the value of b. 2</p>

2018	1	<p>Sketch the graph of $y = (x - 6)(x + 4)$.</p> <p>On your sketch, show clearly the points of intersection with the x-axis and the y-axis, and the coordinates of the turning point.</p> <p style="text-align: right;">3</p>
------	---	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

2019	2	<p>A ball is kicked from a clifftop.</p>  <p>The height, h metres, of the ball relative to the clifftop after t seconds is given by $h = 12t - 5t^2$.</p> <p>(a) Calculate the height of the ball above the clifftop after 2 seconds. 1</p> <p>The graph below represents the height, h metres, of the ball relative to the clifftop after t seconds.</p>  <p>The sea is 17 metres below the clifftop.</p> <p>(b) After how many seconds will the ball hit the sea? 4</p>
------	---	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

2022

1

Sketch the graph of $y = (x + 1)(x - 3)$ using the axes provided below.

On your sketch, show clearly the points of intersection with the x -axis and the y -axis, and the coordinates of the turning point.

3
